RE-ENERGISING CITIES: RENEWABLE ENERGY IN URBAN SETTINGS

18 October 2016 • Quito, Ecuador

The governments of Ecuador, Germany, and the United Arab Emirates, and the International Renewable Energy Agency are pleased to invite you to attend 'RE-energising Cities: Renewable Energy in Urban Settings' forum, held on the second day of the UN Habitat III Conference in Quito, Ecuador.

Meeting every 20 years, the Habitat III will reinvigorate the global commitment to sustainable urbanisation, to focus on the implementation of a New Urban Agenda, building on the Habitat Agenda of Istanbul in 1996. Within this context and for the first time ever, the Conference will discuss the proliferation of renewable energy as a means to achieve a sustainable urban future and common prosperity.

RE-energising Cities will capitalise on this unique gathering of stakeholders to drive the next step-change in the transition to a sustainable urban energy future. The business case for renewables is stronger than ever thanks to ongoing, dramatic cost declines in renewable energy technology. The event will showcase the innovative and transformative ways that cities can benefit from this trend and contribute to the ongoing energy transition. It will share cutting-edge information, highlight examples of successful policy frameworks and other best practice, and discuss priority areas for action to capitalise on the opportunities renewables present in three key sectors: transport, buildings and power generation.

Attendance is free. More details and registration to follow.

EVENT DETAILS:

- » **Title:** RE-energising Cities: Renewable Energy in Urban Settings, high-level conference
- » **Date:** Tuesday, 18 October 2016
- » **Time:** 10:00 - 17:00
- » **Venue:** Escuela Politecnica Nacional (walking distance from Habitat III venue)

Lunch and light snacks will be included.
